Summary

- **Fresh graduate with a Bachelor's Degree in Computer Science** - Graduated from BINUS University (GPA 3.66) with fundamentals in object oriented programming, algorithms, and relational databases, backed by coursework and projects
- **Software engineer with 1 year of professional experience at Bank Central Asia** - Rated as an Excellent Intern from performance assessments made by supervisors, reflecting above-average professional contributions and work quality
- **Impact-driven and collaborative** - Committed to end-to-end solutions through hands-on team collaboration and AI-assisted development (Claude Code), with an eye for learning on the go

Education

BINUS University (Jakarta, Indonesia) **September 2022 - July 2026**
Bachelor of Computer Science | GPA 3.66

- Software Engineering specialization. Bachelor's thesis: Decision Support System for postpaid electricity in households

Work Experience

Application Developer Intern **February 2025 - February 2026**
Bank Central Asia (Jakarta, Indonesia)

- Collaborated with 4 cross-functional teams (Product, UI/UX, Developer, & QA) to develop a web application for the Back-Office Inventory, used by 100+ employees across divisions in the Operation Strategy & Development Group
- Delivered 6 core features for asset and budget management in the Back-Office Inventory app across 4 quarters, following an Agile SDLC based on business and functional requirements, using OutSystems, React, JavaScript, and SQL Server
- Implemented a Batch Updater system within the Back-Office Inventory app, replacing manual record-by-record entry by algorithmically importing data from a Microsoft Excel file, processing 200+ asset records in ∼24 seconds
- Implemented a Cash Advance Management dashboard within the Back-Office Inventory app that enforces spending limits and audit trails across wallets, covering a 6-stage request-to-settlement workflow through multi-level approval routing

Projects

SEMA (Sustainable Electricity Management App) **April 2026 - July 2026**
TypeScript, React, C#, ASP.NET Core/Web API, MySQL, Microsoft Azure, GitHub Actions

- SEMA is a mobile-first web app that turns household electricity readings into bill projections and recommendations
- Conducted thesis research on this app to solve an issue where households find their postpaid electricity bill only after a cycle closes, reaching 70+ users, high user satisfaction, and 33 black-box test passes in production/live environment
- Built REST API for authentication and server-side sessions; integrated Mistral LLM with the recommendation engine
- GitHub Repository: github.com/HansaMuh/SEMA

Grimlite Rev (Visual Scripting Client) **July 2021 - October 2026**
C#, .NET Framework 4.8, JavaScript, GitHub Actions

- Grimlite Rev is a desktop app that enables players to automate gameplay in the online game AdventureQuest Worlds
- Implemented a visual block-based scripting language along with its interpreter, enabling community users to create, share, and run automation scripts powered by syntax rules in the system
- Achieved 467K+ international user downloads (including 10K+ downloads since October 2026) and 60+ GitHub Stars over 5 years of maintaining/improving the app through iterative feature enhancements and incremental app releases
- GitHub Repository: github.com/GentleGanku/GrimliteRev

Signtro (Sign Language Learning Platform) **September 2024 - November 2024**
JavaScript, React, Python, Django Framework, GitHub

- Signtro is a web platform for learning sign language through courses and dictionaries with a camera-based gesture guide
- Built the system interface and Recognition module, integrating JSON data through REST APIs, in a five-member team
- Ran a prototype survey with 40+ users, resulting in 98% having satisfied needs and 83% citing no unmet expectations
- GitHub Repository: github.com/wilbertyg/Signtro

Skills

Programming Languages & Relational Databases: C#, TypeScript, JavaScript, Python, MySQL, SQL Server
Frameworks & Libraries: React, .NET Framework, ASP.NET Core/Web API, Django Framework
Tools & Platforms: Git, GitHub, GitHub Actions, Microsoft Azure, OutSystems, Claude Code, Figma, Jira
Spoken Languages: Indonesian (Native), English (Professional)

Achievements

Semifinalist of Marketeers Innovation Challenge 2023 **November 2023**
National business case competition between 54 teams, by Marketeers x MyPertamina | Certificate: View

- Prototyped app features for MyPertamina as a strategy to increase company revenue, by identifying Pertamina gas stations with traffic detection system and providing integrated e-money for payment transactions

Certifications

TOEFL ITP **November 2025**
Achieved score: CEFR B2 (Upper Intermediate) | Certificate: View
